

Agape Educare is an Early Childhood Centre situated in Asanda Village, Strand, catering for the local community. Providing an opportunity for 100 children to receive a solid educational foundation.

**Providing education and loving care  
throughout childhood.**

## WHY WE DO IT

Agape Educare, was founded by Thabisa and Linda Mdolomba with the goal of getting little children off the streets during the day time and into a safe, caring environment where they would be prepared for a successful career at school. Research has shown that children who attend two years of pre-school have a greater chance of completing their twelfth year of school successfully. However, as a result of socio-economic problems specific to the community of Nomzamo such as unemployment, hunger and homelessness to name a few, early childhood development is often compromised.

## HOW WE DO IT

- In March 2016, the directors of Thembalitsha Foundation adopted Agape Educare as a new project, so Agape could benefit from the administrative services of Thembalitsha.
- Our curriculum encompasses themes of self-care, care for the environment, getting on well with neighbours and friends, and overall making a positive contribution to the community.
- Our Pre-School facilities include a kitchen, a children's bathroom, a playing area and garden, three basic classrooms, an office and a crèche in the church hall.
