

Themba litsha

Themba litsha's newest and most ambitious project to date, EduCare Grabouw is an exciting initiative that aims to contribute to meeting a critical community need. Providing essential Early Childhood Development centres for children who would otherwise not receive an adequate educational foundation.

An early start for a brighter future.

WHY WE DO IT

It is beyond argument that the extent to which children develop in their early years has a significant impact on their potential later in life. This is the primary reason behind the drive for Early Childhood Development (ECD) in South Africa. The guiding principle is that a well-equipped child makes for a well-equipped teenager, who is bound to become a better-equipped adult.

HOW WE DO IT

Within each centre, our approach focuses on every aspects of a child's development, from emotional to social and physical, as well as sensory, cognitive and communicative skills. With this approach, which is in line with the relevant South African legislation and the requirements of the World Health Organisation, we are capable of contributing to shaping healthy, well-balanced individuals.

We are working in partnership with the community to:

- Upgrade existing Community Educare facilities, as well as extending the services they provide.
- Assist Educare Centres in registering with the Department of Social Development.
- Establish new Educare centres where there is a need.
- Develop current staff's skills in providing quality education.
- Our EduCare Hub offers extensive Early Childhood Development support and training.

Through this network of Educare facilities, we will have the ability to offer early childhood development to hundreds of children under the age of five.

*Join us in restoring hope and transforming lives,
because together we can make a difference.*
